# Conquer the Load

**HOLTZ**   
**INDUSTRIES, INC.**

Galbreath roll-off hoists can conquer the most menacing loads with hard working durability, but it takes more than brawn to get the job done. It takes precision performance that only comes from superior engineering. That's why Galbreath roll-off hoists deliver greater payload capacities along with operational ease. They also come in various designs and capacities ranging from 20,000 lb. capacity single axle units up to 75,000 lb. capacity tandem and multi-axle units. In addition, our innovative features, heavy-duty componentry, and skilled craftsmanship ensure exceptionally long service life, load after load, year after year.

Rugged rear hinge is an integral part of the hoist and is designed to take the punishment and stress of the most demanding loads.

An automatic, spring-loaded container locking system, together with rear container hold downs, make a Galbreath the safest and most reliable hoist in the industry.

## AVAILABLE OPTIONS

- Reverse cylinder mount
- Hydraulic tarping systems
- Pintle hook applications
- Various fender selections
- Auxiliary hydraulic hook-ups

Each Galbreath Hoist is equipped with heavy duty safety props to provide a fail-safe system during equipment maintenance.

**Specific product information is available on each hoist model.**

Heavy duty, double-acting lift cylinders

Optional inside cab control system

All hydraulic lines are housed and protected in the subframe

Heavy duty safety props

Outside control system

Heavy duty, four-inch diameter, high strength outside rollers with durable bronze bearings are designed to give incredible long service life. Every working point is greasable.

Wide variety of models available

- A. "OR" (Outside Rail)
- B. "EX" (Extendable Tail)
- C. "SI" (Inside/Outside/Deadlift)
- D. "IO" (Inside/Outside)
- E. "HH" (Deadlift)

Heavy duty winch cable

Automatic spring loaded container locking system

Double-acting, independent-working winch cylinders with individual sheaves

Rugged, four-inch, outside, high strength rollers with durable bronze bearings

Contour-fitted fenders with many styles available

Rear container hold down

Ultra-durable rear hinge

Heavy duty rear bumper with recessed lights (optional)

Choice of corporate or municipal coordinated paint finishes

High Strength, steel subframe

Three-way oil and air filtering hydraulic system

The oil reservoir is designed with a 3-way oil and air filtering system to virtually eliminate contaminants from entering the hydraulic system.

Grease fittings on every working point provide ease of maintenance.

The retracting winch cylinders power the container off. The covered, double-acting, independent-working winch cylinders with individual sheaves are designed to provide exceptionally long service life.
