

HOLTZ INDUSTRIES, INC.

The **WASTEQUIP CONTAINER CARRIER** is a versatile delivery unit, that can be used for a variety of operations. As a front load container delivery unit, it is capable of lifting and handling 2-10 cubic yard containers. With the addition of the optional rotator unit, it is excellent for use as a recycling unit in residential areas, or for transporting and unloading front load containers from recycling centers to processing centers. This unit is equipped to haul both rear and front load containers, which makes this an affordable investment to your container operation.
