

QUALITY ENGINEERED FOR THE OTTO MILLENNIUM

MOLDED FRONT "CATCH" BAR

STEEL FRONT "CATCH" BAR

With over 66 million rollcarts now in use around the globe, Otto Industries, Inc. is the largest manufacturer of rollout waste containers in the world.

Responding to the need to add additional molding capacity to meet the demand for Otto carts in the US market, Otto engineers surveyed customers in developing the list of criteria for superior durability, reliability and ease of use.

Employing advanced computer technologies, Otto Industries, Inc. has engineered and produced a superior rollcart design that delivers the important advantages preferred by municipalities, private collection firms and every-day users in this new millennium.
