

THE EASY-TO-USE ROLL CART FROM OTTO

Tough and Dependable

- ◆ Injection-molding produces thicker, tougher bodies with added strength at load-bearing points.
- ◆ Dual solid-plastic ridges molded onto bottom resist abrasion and add years to useful life.
- ◆ Integrally molded gussets reinforce lift points and stress areas to accommodate heavy loads.
- ◆ Energy absorption detail molded into cart bottom soaks up impacts caused by heavy loading.

Enhanced Productivity

- ◆ Otto "Multi-System Design" (MSD) is compatible with modern semi-automated, fully-automated and two-stream collection systems.
- ◆ Interior is smooth and recess free with no places for trash to become trapped - speeds up collection.
- ◆ Minimal assembly to simplify home delivery. Lids and front (molded) bars are attached prior to shipping.
- ◆ Wheels snap-lock onto axles to save assembly time.

Superior Convenience for Cart Users

- ◆ Cart body is shorter - more convenient to load, allows better vision over cart, and is easier to control.
- ◆ Available with 12" diameter wheels - roll more easily, provide greater stability and are more durable.
- ◆ Cart 'footprint' engineered for stability. Resists tipping and does not blow over - even in 40 mph winds.
- ◆ Lid has hand grip across entire front and around both front corners - very convenient to open.
- ◆ Molded recess allows foot to be placed directly on axle providing leverage for maneuvering heavy loads.
