American Sealants Company

**Simply the  
Best Tire  
Sealant in  
the WORLD!**

# AmerSeal®

**The Ultimate  
Premium Heavy Duty Tire Sealant**  
*Say "Good-bye" to Flat Tires Forever!*

**AmerSeal®** Tire Sealant has been produced in the midwest USA since the late 1970's. It is a time tested effective seal against tire punctures and air loss for the life of your tires.

Get started now as an **AmerSeal** dealer. Everyone is gearing up for outdoor activities; farming, gardening, landscaping, construction, biking, vacation. **AmerSeal** can be used in any air-filled tire from heavy duty power equipment down to wheelbarrows; highway or offroad.

**Permanent Tire Repair • Flat Prevention • Tire Life Extender**

Holtz Industries, Inc. | 200 S Terrace Ct | Newark, OH 43055

# AmerSeal®

All commercial tire operators understand that excess heat build-up is the most common cause of premature tire failure, a fact that has been independently proven.

**AmerSeal** treated tires run between 20-30° f cooler.  
(see question 3)

Ethylene glycol is part of **AmerSeal's** unique hot mix and at 48 % is the highest level in any tire sealant that we are aware of. This ingredient complements the cooling effect.

By sealing the tire's casing, and rim, the correct tire pressures are maintained, reducing fuel costs, and keeping the tire temperature at an optimum level.

## AmerSeal®

**AFFORDABLE PREVENTION  
FOR ALL COMMERCIAL  
VEHICLE OPERATORS**

**AmerSeal** is constantly doing research and development to make sure that our sealant remains the best tire sealant that money can buy anywhere in the world. For example, recently on advice from the chief metallurgist for Alcoa Aluminum we have added a product to **AmerSeal** to make sure that our formula will not corrode or pock alloy aluminum wheels. We use reverse osmosis water in our sealant to ensure that there is no salt or minerals that may rust or corrode a rim. We know of no other sealant companies in the world that go to these measures.

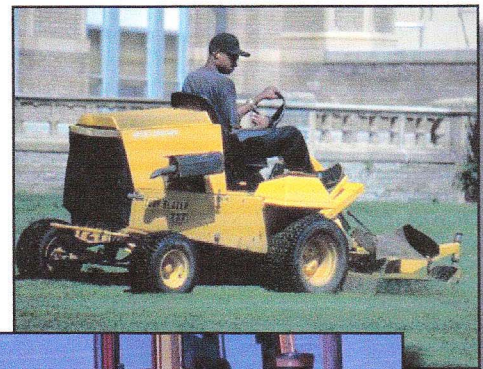

## HOT MIX:

**AmerSeal's** formula is a secret. A hot mix means that we cook the formulation to get a molecular bonding/cross linking between the more than twenty ingredients in **AmerSeal**. For this reason the sealant has an indefinite life and does not break down once applied to a tire. This makes our sealant effective for the life of the tire no matter how long the tire is in service.

**We are not aware of any other manufacturer of a hot mix tire sealant.**

**AmerSeal** is a premium heavy duty tire sealant with a diverse customer base.

**AmerSeal** is used all over the world for all types of tires in varying applications from sporting equipment such as ATV's and dirt bikes to the heaviest industrial equipment, trucking and O.E.M. applications.
