▼ The Best Of Plastic And Steel In One Container

- Plastic molded body is surrounded by a steel frame and base
- Steel frame around and under container body ensures stable lifting
- Body made of strong, durable molded plastic construction
- Lighter weight than steel containers to maximize worker safety
- Liquids inside never touch the steel, preventing rust and corrosion issues

▼ Features

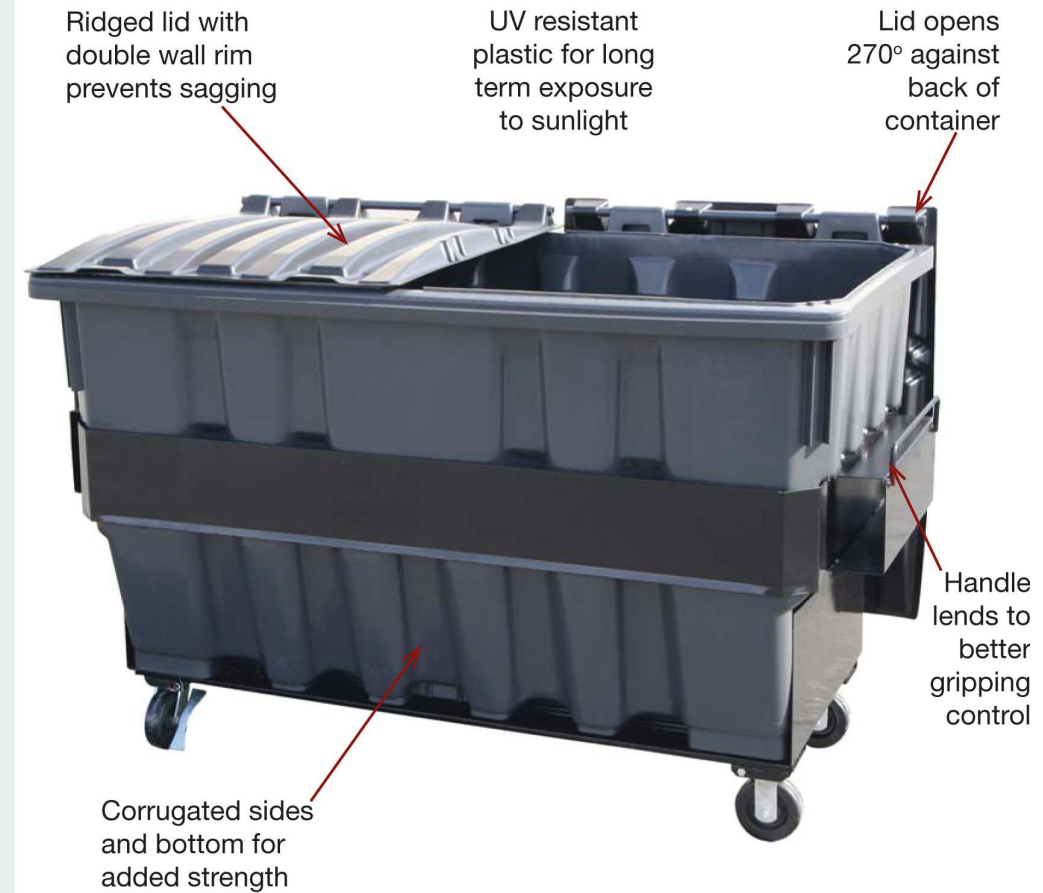

The 4 Yard Front Load is an excellent choice for strip mall locations and other retail venues. Portability, low maintenance and durability make this container a smart investment.

Steelite™ containers are an attractive, easily accessible solution for businesses and are invaluable when used in tight alleys or behind commercial buildings.

Rear Load trunnion bar nests into underside of contoured lip and is stabilized with steel corner and lip plates.

Steelite™

A single lid option is available for the 2 Yard Rear Load.

The Steelite's™ construction provides ergonomic mobility and versatility to perform. For very humid climates, galvanized steel frame is an option.

▼ Features

- 4" caster plates prevent puncturing in container bottom and have single-bolt release
- Standard 6" casters; 8" casters available

The bottom and sides of the container are corrugated for extra strength

- Fully stackable
- Six points of attachment allow container to be easily removed

Easy to maneuver—up to 200 lbs. lighter than comparable steel containers.

▼ Trainable Option

- The Trainable System is attached to steel frame, bearing the weight during towing and minimizing stress to the container body
- Trainable kit is available for the 2, 3 and 4 Yard Front Load containers

▼ Customized Options

- Optional decal plate fits under lip of container with no protruding metal; place company logo or message here

Standard decal plate size is 22" x 27" as shown. Other sizes available

- Mold-in area for company logo located on container body as an alternative option to decal plate
- Custom post-mold graphics available

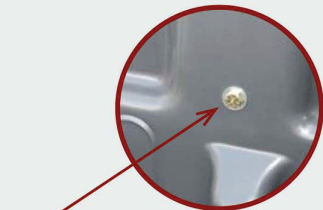

▼ Locking Options

- Chain Lock is available for the Rear Load container with 1/8" link chain
- Lid Lock Bar secures lids and is available for all sizes

Steel frame around and under container body ensures stable lifting to accommodate heavier loads.

Steelite™ containers work well in commercial settings. The steel reinforcement and corrugated plastic is dent resistant, sturdy, and quieter than heavy metal containers.

High quality stainless steel hardware secures steel frame to the container. Front Load above, Rear Load below.

The 2 Yard Rear Load maneuvers well in tight spaces such as alleys, restaurants and in between commercial buildings.
