

Your Driver Never Has To Leave The Truck!

Prevent unauthorized dumping
 Reduce driver fatigue • Increase productivity
 Secure valuable recyclables

Just Pull...

Lift...

...and Go!

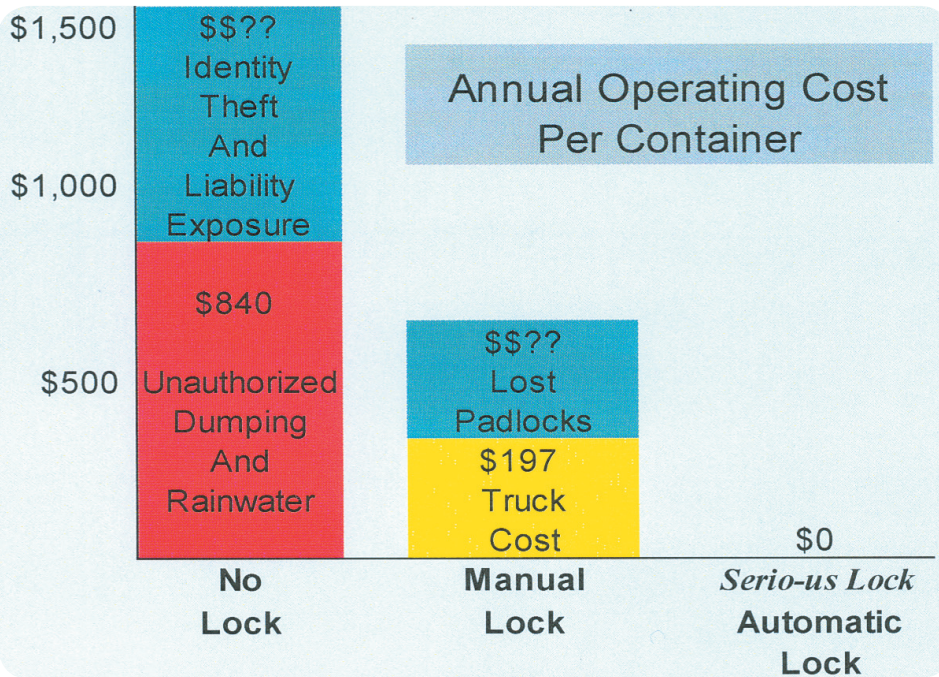

Chart Displaying Costs Associated with Different Locking Options

No Lock

- Unauthorized dumping; unlocked containers are an invitation for unauthorized dumping resulting in additional costs to the hauler
- Rain water; rain water entering the container through open lids can result in as much as 20% more weight in the container
- ID theft; unlocked containers offer no protection to discarded sensitive documents
- Liability; unlocked containers are exposed to the liability of injuries and even death resulting from people entering the containers

Manual Locks

- Eliminates the cost and exposure of an unlocked container • Adds operating costs
- Drivers must get out of the truck in order to unlock & relock the dumpster
- Lost padlocks • Liability & fatigue resulting from drivers getting in and out of the truck

Serio-Us Automatic Lock

- Eliminates the costs and exposure of an unlocked container • NO ADDITIONAL OPERATING COSTS
- Can actually add revenue for the hauler
