## **DUAL PIVOT HOOK HOISTS**

MODELS: U4/5 & U5-DPHK

(DPHK) – Dual Pivot Hook Hoists are ideal for the waste, recycling, landscaping, construction and roofing industries by offering greater versatility than traditional roll-off cable hoists. With adjustable hook heights, the U4/5-DPHK models have the advantage of essentially two hoists in one. Dual pivot hook hoists keep containers safely secured to the hoist frames during the dump cycle with rear container hold downs and a rear pivoting hinge. Through the ease of in-cab hoist operation, the U4/5-DPHK and U5-DPHK models improve operator safety and efficiency through faster cycle times.

### **Standard Features**

- Inside air controls mounted in ergonomic power tower featuring Plug And Play™ wiring
- · Back-up alarm & hoist up alarm with signal light in cab
- · Secondary manual controls mounted outside on driver's side
- · Stationary rear hold downs
- Dual rear rollers are ductile cast iron 6" OD and flared sides with bronze bushing
- Adjustable hook heights via pull pin design (54" & 61 ¾" U4/5-DPHK only)
- In frame rail rollers and bronze bushings allow for smooth loading/unloading)
- · Twin locking mechanism for dual pivot activation
- Pintle adaptable rear apron and bumper assembly complete with DOT approved LED Lighting
- 3 micron return filtration inside of 50-gallon steel tank with dual sight/temp gauge
- Warranty: Lifetime on hoist frame and 2-year limited on hydraulic system
- Customized engineering layouts ensure the exact fit for each customer
- Engineered and manufactured in the U.S.

Inside air controls mounted in ergonomic power tower featuring Plug And Play™ wiring

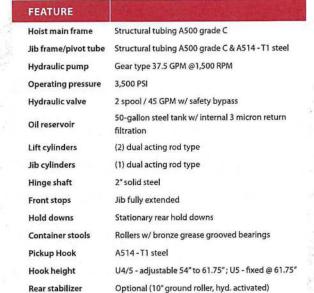

Secondary manual controls mounted outside on driver's side

3 micron return filtration inside of steel tank

50-gallon steel hydraulic tank side mounted with dual sight / temp gauge

In frame rail rollers and bronze bushings allow for smooth loading / unloading

Twin locking mechanism for dual pivot activation

Dual rear rollers are ductile cast iron 6" OD and flared sides w/ bronze bushing

Pintle adaptable rear apron; Stationary rear hold downs

# **Available Options**

- Pioneer tarping systems
- Toolbox (various sizes and styles: steel, aluminum and poly)
- · Pintle hook tow packages
- · Back-up camera systems
- Hydraulics / wet kits to the rear (single & dual acting)
- Fenders (various sizes and styles: steel, aluminum and poly)
- · Safety and work light packages
- · Pass through hold downs
- Short stops for shorter containers \*U5-DPHK-200 only
- Rear hydraulic activated stabilizer with 10" ground roller

Pioneer tarping systems

Toolbox (various sizes and styles: steel, aluminum and poly)

Pintle hook tow packages; Back-up camera systems

Fenders (various sizes and styles: steel, aluminum and poly)

Safety and work light packages

Back-up camera system

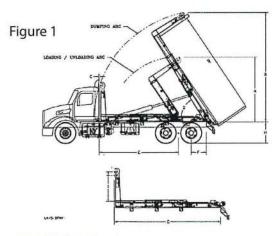

Rear hydraulic activated stabilizer with 10" ground roller

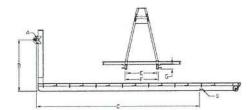

**U5-DPHK-200** shown with Pioneer RP4500SARG; Full length bumper; (2) lift axles; 4" work lights and quad axle poly fenders

#### **Notes for Figure 1**

- 1 When recommending container lengths, weight distribution, fender interference and overhang are factors. Please consult your local ordinances when determining the model of hoist needed to suit your container needs.
- 2 Factory tested with recommended container length and water level load.
- 3 Total maximum height will depend on the container and frame height. Consult engineering for clearance.
- 4 Frame Height = Top of truck chassis frame to ground. Using 22 ½" tires only. Tested w/ 43 ½" frame height; any truck frame higher than 43 ½" will change hoist capacities, dump angle and its ability to snatch onto the bar. For higher truck frames or using larger tires, consult engineering for clearance and capacity ratings.
- 5 This distance does not allow for a behind the cab (BTC) oil reservoir, tarper platform and or room to add a tarper; must add space for those items.
- 6 Air ride suspensions require up to 25" maximum after frame.

Lift Bar Dia.	Hook Ht.	Bar to Hold Down	Hold Down Locations	Inside Sill Width	Outside Sill Width	Long Still Ht.
A	В	с	D	E	F	G
2 1/2"	54"	197 ½" min.	Inside & Outside	36 ½" min.	41 ¾" max.	6"
2 1/2"	61 34"	197 ½" min.	Inside & Outside	36 1/2" min.	41 ¾" max.	6"

#### Minimum Truck Requirements (Tandem Axle)

Axle rating: 18,000 front / 44,000 rear

Truck torque: 418 ft. lbs.

\*The chart below is an example of how to calculate the chassis section modulus (RBM / PSI = SM). Regardless of the frame YIELD and RBM, the min. 5M must be 20 in or more per each frame rail.

Truck Channel Ht.	RBM	Yield (PSI)	RBM/PSI = SM in <sup>3</sup>	
10" or more (single wall)	2,400,000- 4,500,000	120,000 psi	20 in <sup>3</sup> - 37.5 in <sup>3</sup>	
10" or more (double wall)	2,000,000- 4,000,000	100,000 psi	20 in <sup>3</sup> - 40 in <sup>3</sup>	

Note: The single walled 120k psi with RBM less than 2,400,000 would not be acceptable because its SM would fall below the  $20 \, \text{in}^3$  minimum specification (2,300,000 / 120,000 = 19.17 in ). For frames less than  $10^+$  consult engineering.

pecifications (Tandem Axle)	U4/5-DPHK-176	U4/5-DPHK-200	U5-DPHK-176	U5-DPHK-200	U5-DPHK-224
Recommended Container Size – 1	16'to 20'	18' to 22'	16' to 20'	18' to 22'	20' to 24'
Rated Hoist Capacity @ Hook Height 2	40k lbs. @ 54" 50k lbs. @ 61 ¾"	40k lbs. @ 54" 50k lbs. @ 61 ¾"	50k lbs. @ 61 ¾"	50k lbs. @ 61 ¾"	50k lbs. @ 61 ¾"
